

Protect Your Guests When Motoring

A MOTOR Robe is a necessity, not an accessory. Don't endanger the health of your guests by taking them motoring without a robe.

The warmest day may "break" and become chilly—such decided changes in the weather need your serious thought. Be prepared and have a robe along.

WELSH MARVEL MEETS SHARKEY

Jimmy Wilde Is Willing to Concede 10 Pounds to Jack Sharkey

WILDE CAN HIT FROM NEARLY ANY ANGLE

Match Will Be Staged at the Auditorium in Milwaukee

Milwaukee, Dec. 6.—Jimmy Wilde, Great Britain fly weight champion, will make his first American appearance here to-night, meeting Jack Sharkey, a rugged New York bantamweight, in a ten-round, no decision contest. The match will be staged at the auditorium, which has a seating capacity of 10,000. Indications were that the contest would draw \$40,000. Wilde has been guaranteed \$11,000.

The little Welsh boxing marvel, who does not hesitate to give away ten pounds to opponents, probably will enter the ring weighing about 106. Sharkey has agreed to scale 116 pounds at 7 p. m., and probably will enter the ring three hours later weighing about 118 pounds.

Wilde, pale and anaemic in appearance, is both a boxer and a fighter. He can hit from almost any angle and is a master at the art of feinting with his head and drawing an opponent on making him miss with the next move. The British boxer has been on the ground ten days training for the match and he is reported to be in splendid condition.

Sharkey, who has boxed the best bantam weights in this country, also finished his training here and assured his admirers he would be able to scale the stipulated 116 pounds without weakening himself. The New Yorker is on the short end of the betting, with Wilde's admirers offering 2 to 1. A few wagers of 3 to 1 also have been reported.

Several hundred boxing fans will make the trip from Chicago, while delegations from New York, Cleveland and other cities will be at the ringside. Prices of seats ranged from \$1 to \$8.

NAVY VICTORY BUTTONS.

Will Be Given to All Who Served in Reserve or Regular Navy.

Washington, D. C., Dec. 6.—Victory buttons will be issued by the navy department to all persons who served in the reserve or regular navy during the war. Announcement was made by the department today that distribution of the buttons which are of bronze with an appropriate design would begin at once. Recruiting stations have been authorized to issue them to all eligible persons now discharged or on inactive duty, and a supplementary distribution will be made from the bureau of navigation in Washington. Silver buttons of the same design, it was said, will be issued to those who received wounds during the war.

The victory button, it was explained, is awarded in addition to the victory medal, distribution of which is expected to begin shortly.

STREET CARS RESTORED.

Toledo People Will Pay Same Fare as Before.

Toledo, O., Dec. 6.—After walking and riding in buses for 27 days, at 10 cents or more per ride, Toledo returned today to the old system of using street cars.

Resumption of service was to begin at 3:30 p. m., it was announced by Henry L. Doherty, who stored his cars in Michigan when the people sustained a council order ordinance at the last election.

The fare is to be the same when the cars were taken away, six cents and two cents for transfer.

The bus men held a meeting last night and decided to remain in business at five cents and one cent for transfers.

Wood and Coolidge the South Dakota Ticket.

The Republicans of South Dakota pay Massachusetts the handsome compliment of selecting both candidates for the presidential ticket next year from among their citizens. The order should be reversed. Gen. Wood possesses altogether admirable qualifications for the presidency, and we hope the ticket thus adapted will prevail. Nor would the constitution stand in the way of its success. Our electors in Massachusetts could not vote for more than one of the two, but every other state would be free to do so if the South Dakota combination, actual or reversed, should be accepted.

Conventions were held in that state yesterday for the purpose of making presidential choices to go before the votes in a primary election next March. But candidates who fail of endorsement of the party convention may get their names before the primary voters on petition. South Dakota also asks each man who aspires to the presidency to come there to tell, either personally or by representative, what he would do if elected. We note that our own governor has not quit the state to go out there to set forth the policies which would guide his administration of federal affairs. Perhaps that is why they decided to give him only second place.

The preference for Wood matches with that for Wilson on the other side. The Democrats of the state cannot be familiar with the minute details of the situation; they know little of the president's health or condition; they are not greatly disturbed over the third-term tradition. They simply say Wilson because they know nothing else to say. The Republicans, on the other hand, have undoubtedly heard more about Gen. Wood than anybody else. He is somewhat indiscreet in his utterances, in public and in private, but there is a certain advertising value in these indiscretions which profits him much in our highly popularized election machinery of which South Dakota is extreme.—Boston Herald.

NEARING FINISH BIKERS IN SPILL

Weber of Newark Six-Day Team Was Taken, Unconscious, to Quarters

NINE TEAMS TIED AT 12TH HOUR

Race in Madison Square Garden Will Close at Midnight To-night

New York, Dec. 6.—Nine teams in the six-day bike race at Madison Square garden were tied for the lead at 8 o'clock this morning, the 12th hour. Each team had covered 224 miles and eight laps at that time, as compared with the record of 2,066 miles and four laps by Cameron and Kaiser in 1914. The Belgian team of Buysse and Spissens regained the lap that it had lost and was again tied with the leaders.

The Italian team of Brocco and Varri was one lap behind the leaders and Bello and Thomas were one lap behind the Italian combination. The Canadian-American team of Spencer and Chapman was three laps behind the leaders.

Weber of the Newark team had a bad fall early this morning and was taken to his quarters unconscious. Magin, Dupuy and Coburn also fell, but no serious injury resulted and they were able to continue in the race.

Three teams have dropped out since the race began. The contest closes at midnight to-night.

HOLD UP MONEY INVOLVING MAYES

Until Courts Have Made Final Disposal of the Matter Relating to Baseball Pitcher.

Chicago, Dec. 6.—August Herrmann of Cincinnati, chairman of the national commission, who has been in conference here with President B. B. Johnson of the American league, expected to leave for New York late today to attend the annual meeting of the National league there next week.

Chairman Herrmann said the only business disposed of at the conference with Mr. Johnson related to routine cases under consideration by the commission.

Both officials denied that the contest over the distribution of the third team's purse from the recent world's series had been discussed, but expressed the opinion that until the courts had made a final disposition of the case of Pitcher Carl Mays, the money must be held in escrow to avoid possible tangles over it later.

FOOTBALL MATCH TO DECIDE CHAMPIONSHIP

Somerville, Mass., High School Meets Scott High School at Toledo To-day.

Toledo, O., Dec. 6.—A football game intended to decide the high school championship between the east and west, was played here to-day between Somerville, Mass., and Scott high school, on Scott field.

Scott has not lost a game in three years. The team has made two trips east, winning the sectional title in 1917 by defeating Haverhill and the following year by winning from Marblehead.

Somerville is said to be outweighed slightly.

CONTEMPT OF COURT CHARGED

Against Officers of Two Local Miners' Unions in Indiana.

Indianapolis, Dec. 6.—An information for contempt of court was filed yesterday by L. Ert Slack, United States district attorney, and Dan W. Simms, special attorney general, against officers of two local United Mine Workers' unions of Clinton, Ind., charging them with having violated the injunction of Judge Anderson by paying strike benefits.

"SYRUP OF FIGS CHILD'S LAXATIVE"

Look at Tongue! Remove Poisons from Stomach, Liver and Bowels.

Accept "California" Syrup of Figs only—look for the name California on the package, then you are sure your child is having the best and most harmless laxative or physic for the little stomach, liver and bowels. Children love its delicious fruity taste. Full directions for child's dose on each bottle. Give it without fear.

Mother! You must say "California."

FEET SORE?

MINTOL applied at night will make your feet feel to years younger in the morning and take the sting out of corns.

For Sale by Barre Drug Co.

Makes Life Worth Living

You cannot be constipated and happy at the same time. If almost everything you eat distresses you, and brings on a headache, gas on the stomach, heartburn, etc., you can easily eliminate these conditions by taking SEVEN BARKS, the favorite root and herb remedy for stomach disorders.

SEVEN BARKS will expel the distressing acids, and dangerous poisons, and help you back to good digestion and active health, making life worth living again.

Do you sleep well? or are you troubled with almost sleepless nights? While there are many causes for sleeplessness, it generally happens that deranged stomach, liver or intestines are the real cause of the trouble. If your appetite is not good, or food distresses you, or the bowels do not move daily, you can get relief from these disagreeable conditions by simply taking 10 to 20 drops of SEVEN BARKS in a little water after meals; this is nature's remedy, made from the extracts of root and herbs, has stood the test for nearly 50 years, and will certainly give you a feeling of new life.

If you would have the glow of health, and banish the blues, don't neglect to ask your druggist for SEVEN BARKS. Costs but 50 cents.—Adv.

C. I. OHRENSTEIN ON CHRISTIAN SCIENCE

(Continued from page 1.)

the Bible, and ministered unto Jesus? In the Christian Science text-book, "Science and Health with Key to the Scriptures" by Mrs. Eddy, on page 581, we read: "Angels, God's thoughts passing to many, spiritual intuitions, pure and perfect; the inspiration of goodness, purity, and immortality, counteracting all evil, sensuality, and mortality."

Cannot all see how such angels could and did indeed heal the children of Israel, how they could and did minister unto Jesus, how they could heal you and everyone, and minister to us all? Have not all of you entertained such angels, time and time again, unawares? Have not pure, spiritual intuitions, inspirations of goodness, come to you and to all, and have they not been helpful to you? Where did they come from? From your brain, or from anyone's brain? No. They came from Mind, the only true Mind, God, to inspire, to enlighten you, to bear you up, and to set you up on high. Have we all been inspired then? Of course we have. Have we always heeded these inspirations? That is the question. It is not uncommon to hear that someone is inspired by malice or hate. Every one is ready to credit this, but let someone be said to be inspired by God, who is infinite power, intelligence, life, truth, and love, and derision and reviling are sure to be his lot. Is not everyone inspired with life? If not, then does anyone else have not all inspired by Mind, Truth, Love? If not, how do you express intelligence, how is it that you are truthful, kind, loving? Does this surprise you? Then let me say that you were inspired before you ever breathed or saw the light of day, and that inspiration is the one essential of existence.

Everyone is most particular as to the air he breathes. No one without absolute necessity would for a moment breathe foul air. Everyone is most particular as to the food he eats, what he drinks, and so forth. How much more particular should he be as to what he is inspired by, for whether the thought that comes to us be good or bad, it is one that comes to us, not one that originates with us, and sooner or later we are bound to express it. Is it pure, beautiful, good, true, the thought of health, of life, of immortality, of courage, and of love for all? If so, it comes from the one true source. Did it welcome, let it abide with you, entertain it, make it your honored and your welcome guest. It comes from God, and is the word of God, an angel visitant, sent as of old to heal, to minister, to save. Is that which clamors for admission a base, sinister, degraded thought, a thought of want, discontentment, lust, anger, sickness, death? Then bar it out, for it will express itself, bear fruit after its kind. How bar it, say you? By recalling and recalling the thoughts, the angels of God and of His Christ, the truths taught in the Bible by Jesus, emphasized, illumined, and made practical by Christian Science, until these shall be an angel legion round about you to guide you, guard you, and have charge over you.

How often do we hear the question, "How can I help what I think?" and the answer, "No one can help what he thinks. We not only can help what we think, but in order to do better, feel better, be better, we must help what we think, for as a man 'thinketh in his heart, so is he'; and the way that has been indicated, the way that Christian Science teaches, is the only way in which this help can come; the only way under heaven in which men can be saved here, now, anywhere, everywhere, from all of any kind and of every kind. It is the only way in which one and all, irrespective of time, place, vocation, circumstances, can be truly armed and prepared, have absolute safety and complete efficiency.

A Word About the Discoverer and Founder.

What has been said will but dimly indicate the teachings of the ideal, yet most practical and scientific system of ethics and healing discovered in the words and works of our Master by Mrs. Eddy. Through her faithful, loving, Christlike leadership Mrs. Eddy founded this system, Christian Science, and advanced it to its present world-wide acceptance. Bringing what she did to the world—the "pearl of great price," the applicable, demonstrable Christianity of Christ Jesus, which has proved itself such by comforting, reforming, and healing the vast majority of those who have honestly, earnestly studied her books—she has enriched the world beyond all reckoning.

As one who had the privilege of visiting her home, let me say that all about Mrs. Eddy was of the very simplest. In her world indeed had a true example of a simple living and high thinking. Those who were with her bear loving witness to the fact that she watched, worked, prayed without ceasing, and that she did this for all alike. That this untiring consecration has borne fruit—the fruit of purer, happier, healthier, more useful and loving lives—is attested on every hand. The modest fortune that came to Mrs. Eddy through the publication and sale of her written works is by her direction, like her life, being devoted to the promulgation of her high teaching; to the establishment of "on earth peace, good will toward men; to the establishment of the kingdom of God on earth, in which there can be no sorrow, no pain, no death.

MANY CUT OFF FROM FOOD

By Grounding of the Canadian Government Steamer Aranmore

ANOTHER STEAMER AIDS THE LATTER

Labrador Coast and Strait of Belle Isle People Are Likely to Suffer

Halifax, N. S., Dec. 6.—Marine authorities exerted every effort to-day to relieve the plight of keepers of light houses and wireless stations on the Labrador coast and islands of the Strait of Belle Isle, whose winter food supplies have been cut off by the stranding last Wednesday of the government steamer Aranmore, on Cape Whipple.

Meanwhile the government steamer Montcalm, kept at a distance of two miles from the ground supply ship by shoals too dangerous to navigate in the heavy seas, was trying to devise some means whereby the provisions aboard the Aranmore could be transferred.

Unless the Montcalm is able to effect the transfer within a short time, the isolated light keepers and radio operators will be in dire straits, as they are virtually dependent on the expected supplies. The sending of another ship with a new cargo from some Canadian port appeared the only solution to-day, as it was feared that even if the Montcalm could remove the cargo of the Aranmore, she would not have time to reach the various stations before the great winter ice fields closed in on Labrador coast.

A message from the Montcalm said the crew of the Aranmore had abandoned the ship and spent last night on an island nearby.

ZINC SMELTERS DISMANTLED

And Many Others Are Practically Abandoned.

Figures compiled by C. E. Sienbenthal of the United States geological survey, department of the interior, from reports submitted by all zinc smelters which operated during the first six months of 1919 show that the production of zinc from domestic ore in that period was 247,584 short tons, and from foreign ore 7,918 tons, a total production of 255,502 tons, as compared with 260,664 tons in the last half of 1918 and 257,263 tons in the first half.

The stock of zinc held at smelters on Jan. 1, 1919, was 41,241 tons, and on June 30 it was 59,651 tons, an increase of 18,410 tons. The stock on June 30, 1918, was 44,502 tons. The stock of zinc held by the war department on May 20, 1919, was reported as 39,000 tons, 9,000 tons of which was held at products' plants and the remainder at plants which had been engaged in making munitions. In July the government stocks were reported as 21,000 tons of grade A and 5,000 tons of all other grades. The latest inventory by the war department, Aug. 30, shows 10,821 tons of slab zinc and 66 tons of sheet zinc.

The decrease in government stocks was due in part to the purchase of government holdings of their own brands of high-grade spelter by the larger producers.

From the foregoing figures and the records of the bureau of foreign and domestic commerce it is calculated that the apparent consumption for the period was 159,501 tons, as compared with 212,060 tons in the last half of 1918 and 211,870 tons in the first half.

In addition to the zinc produced from ore, 7,328 tons were redistilled from zinc ashes, skimmings and drosses. Much of this zinc was of grade above prime western, and the total, added to the primary output, gives 262,830 tons, consisting of 30,154 tons of grade A, 25,802 tons of grade B, 43,481 tons of grade C, and 163,393 tons of grade D. The output in the last half of 1918 was 63,134 tons of grade A, 29,865 tons of grade B, 65,009 tons of grade C, and 117,899 tons of grade D, showing a decreased production of the higher grades and an increased production of grade D, or prime western metal, for the current period. The decrease in the higher grades was due to the decrease in demand, a result of the close of the war.
